

Discover Higher Quality Dental Care at a Recession-Proof Price!

All New Patients During October 2009 Will Receive \$50 Off Their First Appointment at The Center for Natural Dentistry in Encinitas, CA (online at <http://NaturalDentistry.us>)

October 8, 2009 – Did you know that dentistry doesn't have to be painful? That cavities can be filled *without* drilling? Did you know you can receive higher quality dental care at a lower price than what you're used to? Did you know that -- even without insurance -- your dental checkups don't have to be expensive? It's true!

The Center for Natural Dentistry -- founded by [Encinitas natural dentist](#) Dr. Marvin -- is altering perceptions... and providing a special offer for all new patients: **\$50 off your first visit if scheduled in October 2009!**

So how is The Center for Natural Dentistry different (and why should you visit)?

When you visit Dr. Marvin's dental practice in Encinitas, CA, you won't see a sterile, cold office. He won't "drill first, ask questions later." He doesn't take needless (expensive) x-rays. He won't rush you out of the office so he can move on to other patients. He uses the highest quality materials and the most advanced techniques with every patient.

And just because his office is inviting, his techniques advanced, and his materials the highest quality, it doesn't mean he's more expensive. In fact, his prices are more affordable than many other dentists'!

The bottom line: When you visit the Encinitas dental practice of Dr. Marvin you will receive higher quality care for a lower price.

So why haven't you heard about him yet? Because The Center is a new, progressive dental practice in an old, stodgy field.

Most dentists prefer to use outdated, antiquated materials and techniques because it's what they know. It also provides the highest profit margin. (For instance, did you know there are high and low quality filling materials and you could be receiving low quality but paying high prices? Did you know your dentist doesn't have to take expensive x-rays every visit?)

The Center for Natural Dentistry is different. The affordable, progressive dental practice in Encinitas, CA provides a stress-free, safe, affordable, effective alternative to traditional dentistry in San Diego County.

"I definitely recommend (The Center for Natural Dentistry). It doesn't feel like a dentist office and it's shaping up to be the first positive dental experience I've ever had."

*Brian D.
Patient at The Center for Natural Dentistry*
